

REDUCE THE RISK OF FIRE IN YOUR HOME IN SIX SIMPLE STEPS

Protect your home with working smoke alarms

Install smoke alarms on every floor and test them every week

Take extra care in the kitchen

Over 50% of accidental house fires start in the kitchen

Check your electrics

Keep electrical appliances in good working order

Plan a safe escape

Make sure you know how to get out of your home in an emergency

Smoke safely

Put cigarettes out properly and dispose of them carefully

Make sure you sleep safe

A bedtime safety routine can reduce the risk of fire whilst you're asleep

INCREASE YOUR SAFETY ON THE ROADS IN SIX SIMPLE STEPS

Reduce your speed

Speed is a major factor in fatal road accidents

Don't use your mobile phone

You are four times more likely to crash, injuring or killing yourself and other people if you do

Always wear a seatbelt

- You are twice as likely to die if you don't

Not wearing a seatbelt can be a fatal decision even on short, familiar journeys and at low speeds

Drinking and driving - don't do it and beware the morning after

You could be over the legal limit many hours after your last drink. If you're drinking alcohol, plan how to get home without driving

Watch out for cyclists and pedestrians

Always keep a look out for other road users

Don't drive tired

20% of accidents on major roads are due to tiredness
